# ESG REPORT 2020

# Message from our CEO

We fully concur with Larry Fink's saying and have made it our motto. Consequently, we have decided to publish our first annual Environmental, Social and Governance (ESG) report. We are very happy and proud that our company has been developing in parallel with the industry and focusing even more in keeping the environmental, social and governance aspects of our business at the core of our operations. This belief is shared between all employees of our company. We, of course adhere to all international regulations pertaining to the shipping industry and welcome all efforts of the United Nations (UN) and International Maritime Organization (IMO) to further improve the ESG picture of our industry. We are more focused than ever to the industry's de-carbonization process for our fleet, the digitalization of our company and the well-being of all our employees.

The COVID19 outbreak has had a major impact on the shipping industry. Caring for our shore and ship personnel has become extremely difficult due to the pandemic. Our first ESG report comes at the right time as we acknowledge the difficulties and act accordingly to keep our personnel safe and well, despite the challenges that we faced during the year. Even though some of the company's normal activities have been severely impacted or restricted, we have been able to find new ways to adapt to the new norms. We expect that in the post-COVID19 era, there will be an increasing need on strong ESG practices and this is also our focus for the future.

*"A company's ability to manage environmental, social, and governance matters demonstrates the leadership and good governance that is so essential to sustainable growth."*

*Larry Fink,  
CEO of BlackRock*

Our plan for the future is to renew and expand our fleet with younger and environmentally friendlier vessels, whilst at the same time reaping the rewards of our competitive strengths which include an experienced management team, cost efficient vessel operations and strong relationships with customers and financial institutions. We are confident that the combination of our ESG principles in tandem with our afore-mentioned competencies will result in improved returns for our shareholders too.

This year's ESG report forms the basis from which we will continuously strive to further improve our footprint. In this report, we have tried to explain and quantify, wherever possible, the company's policies, procedures, decisions, and future aspirations. Key Performance Indicators (KPI's) are provided in order to depict the company's annual performance and form the basis for future comparison.

We are committed to continuing our sustainability journey and doing our part to contribute to the de-carbonization of the maritime sector and to create a fair and just future for seafarers and communities.

Aristides J. Pittas  
Chief Executive Officer

# Who we are

EuroDry Ltd was formed on January 8, 2018 under the laws of the Republic of the Marshall Islands to consolidate the drybulk fleet, including the 3 newbuilding vessels, of Euroseas Ltd into a separate listed public company. EuroDry was spun-off from Euroseas Ltd on May 30, 2018 and it trades on the NASDAQ Stock Market under the ticker EDRY.

EuroDry Ltd is a global shipping Company providing worldwide seaborne transportation solutions in the drybulk section and employs its vessels on spot and period charters.

At the end of 2020, the Company owned a fleet of 7 vessels, including 4 Panamax, 2 Kamsarmax and 1 Ultramax. These 7 bulk carriers have a total DWT of 528,931 and an average age of 11,6 years.

- ▶ 2x Kamsarmax: Avg. Age: 3 years, Carrying Capacity: 164.000 DWT
- ▶ 4x Panamax: Avg. Age: 18 years , Carrying Capacity: 301.431DWT
- ▶ 1x Ultramax: 3 years old, Carrying Capacity 63.500 DWT

EuroDrys' operations are managed by Eurobulk Ltd., an ISO 9001:2015 (Quality Management) and ISO 14001:2015 (Environmental Management) certified ship management Company and Eurobulk (Far East) Ltd. Inc., which are both responsible for the commercial and technical management of the vessels. Eurobulk Ltd and Eurobulk (Far East) Ltd. Inc. ensure that the vessels are run in accordance with EuroDrys' standards; as per its established policies and adhere to the requirements of the International Safety Management (ISM) Code for the Safe Operation of Ships and for Pollution Prevention.

Eurobulk Ltd and Eurobulk (Far East) Ltd. Inc. include all our executives and have infrastructure and personnel dedicated to the management and operation of our ships, as well as the promotion and development of our commercial interests. Consequently, wherever appropriate, Eurobulk Ltd and Eurobulk (Far East) Ltd. Inc, have been included in the scope of this report.\*

\*For the purpose of this report we will analyze the data collected by our management Companies which in some cases may include data from vessels not only under the ownership of EuroDry.

# ESG at EuroDry Ltd

The Company’s vision is to grow for the benefit of its shareholders whilst at the same time committing to a sustainable growth, digital innovation and protection of the environment in line with the nature of the industry and always in compliance with the international regulations in place and even exceeding them where possible.

EuroDry’s business strategy is focused on providing consistent shareholder returns by carefully selecting the timing and the structure of its investments in bulk carriers vessels and by reliably, safely and competitively operating the vessels owned, through its affiliates, Eurobulk Ltd and Eurobulk (Far East) Ltd. Inc.

Representing a continuous ship owning and management history that dates back to the 19th century, EuroDry believes that one of its competitive advantages is its ability to select and operate safely and economically vessels of any age. EuroDry continuously evaluates sale-and-purchase opportunities, as well as long term employment opportunities for its vessels. EuroDry plans to expand its fleet to increase its revenues and make its drybulk fleet more cost efficient, environmentally friendly and attractive to its customers.

The company’s aim is to implement an ESG strategy aligned with the IMO’s Green House Gas (GHG) emission reduction targets and the UN’s Sustainability Development Goals (UN SDG’s). We are looking forward to the SDGs’ full achievement ensuring that we act as active supporters by promoting an inclusive , diverse, healthy and safe working environment (both onboard our ships and ashore) and building a responsive, profitable and sustainable business which is governed with consistency and transparency.

This report covers EuroDry’s operations in 2020 and is based on the Sustainability Accounting Standards Board (SASB) standards. Additional criteria have been considered as well, such as the Global Reporting Initiative (GRI), the NASDAQ ESG reporting guidelines and UN’ SDGs, in compiling the report content.

# CORPORATE GOVERNANCE

# Our Board of Directors

- The Board of Directors (BoD) of EuroDry Ltd is committed to its fiduciary responsibility to represent shareholder interests and oversee the management of Eurobulk's and Eurobulk's FE business setting high standards for the Company's directors, officers, and employees.
- The corporate governance standards of the New York Stock Exchange (NASDAQ) are different for United States domestic issuers and foreign private issuers. While a number of the NASDAQ corporate governance standards for United States domestic issuers do not apply to EuroDry Ltd as a foreign private issuer, the Company still strives to meet this optional higher standard.
- The procedures and standards adopted by the Board of Directors to fulfill its responsibilities are recorded in the charters of the Board Committees, our policies and in various guideline documents, all of which are available in the Corporate Governance section of the Company's website.
- The Board of Directors has established an Audit Committee which is summarized below and decided to act as a whole on matters of Compensation and Nomination:
- Our Audit Committee consists of 3 independent directors and is responsible to represent and assist the Company's BoD in its general oversight of the Company's accounting and financial reporting processes, audits of the financial statements, and internal control and audit functions. More specifically the audit committee is responsible for (a) the preparation, presentation and integrity of the Company's financial statements; (b) accounting and financial reporting principles; (c) the Company's internal controls and procedures designed to promote compliance with accounting standards and applicable laws and regulations; and (d) the performance evaluation of the Company's independent auditors and internal audit function. Another significant role of the Audit Committee is to identify and monitor financial business risks as well as ensure that we fully meet all the disclosure requirements of regulatory authorities.

**The Company promotes transparency and accountability and is committed to conduct business ethically.  
We stand by our code of ethics & anti-bribery , our anti-fraud policy and our whistleblower policy.**

## An ethical workplace

We have adopted and communicated our code of ethics & anti-bribery policy to our employees, directors, officers and agents. The code covers the following key topics:

- Conflicts of Interest
- Corporate Opportunities
- Related Party Transactions
- Confidentiality and Privacy
- Honest and Fair Dealing
- Protection and Proper Use of Company Assets

- Compliance with Laws, Rules and Regulation
- Securities Trading
- Disclosure
- Procedures Regarding Waivers
- Internal Reporting and Whistleblower policy

# BoD Members and Executives structure

Our Board of Directors and executive officers , as of the date of release of this report, are the following:

BoD composition	Role	Committees
Aristides J. Pittas	Chairman	
Aristides P. Pittas	Vice Chairman	
Anastasios Aslidis	Director	
Christian Donohue	Director	
Panagiotis Kyriakopoulos	Director	Audit committee Chairman
Apostolos Tamvakakis	Director	Audit committee
George Taniskidis	Director	Audit committee

Executive Officers	Capacity
Aristides J. Pittas	Chief Executive Officer
Anastasios Aslidis	Chief Financial Officer & Treasurer
Symeon Pariaros	Chief Administrative Officer
Stephania Karmiri	Secretary

# Corporate Governance structure

## Code of ethics

- All of our employees are required to follow our code of ethics & anti-bribery policy and, in case of any suspected violations, they may report to the Chairman of the Audit Committee openly, confidentially, or anonymously – as per our internal reporting and Whistleblower policy.
- During FY2020, no bribery, fraud, or other whistleblowing incidents were recorded; neither were any violations of our ethical principles or anti-corruption policy.
- We recognize that exposure to corruption risks may vary by geography. In 2020, **no port of calls** were in countries in the 20 lowest rankings of Transparency International's Corruption Perception Index (CPI).

## Internal controls

- In order to ensure robust governance practices, disciplined business processes, and high levels of transparency and disclosure, we have developed a rigorous and effective internal control environment. The Company's independent auditing firm is responsible for performing an audit of the consolidated financial statements in accordance with generally accepted auditing standards.
- We have also a dedicated Internal Audit team responsible for monitoring and testing our internal procedures to ensure that risk management practices, controls, and overall governance processes are adhered to.
- The Audit Team is tasked with continuously improving our control environment, and to ensuring that the quality of our internal controls on financial reporting meets and exceeds compliance requirements under Sarbanes-Oxley (SOX).
- The Internal Audit team reports to the Audit Committee, making recommendations and/or suggesting corrective actions that will assist in accomplishing our business objectives.
- During 2020, a total of **208 internal controls** were tested. No material weaknesses or significant deficiencies were identified, however **4 deficiencies** were raised.

Risk management:  
The key risks associated with our business are grouped into the following 5 categories:

**External Environment**  
External Environment risks, arise when there are external factors or influences that could impact our business operations.

**Operations**  
Operations risk, is the risk that our operations are inefficient and/or ineffective in executing our business strategy and/or subject to human error and meeting our customers' needs.

**Financial**  
The risk that cash flows and financial risks are not managed cost-effectively such as to maximize cash availability, etc.

**Information Technology**  
The risk that information technologies used by the Company are not operating as intended, or are compromising the integrity and reliability of data and information, etc.

**Fraud**  
Risks associated with management fraud, employee fraud, illegal and/or unauthorized acts, any or all of which could lead to legal action against us and/or to reputational damage in the market.

2

OPERATIONAL EXCELLENCE

# Operational excellence

We consider Health and Safety to be an essential value and safeguarding it is our top priority. Alongside our commitment to protect the environment in our daily operations, we are focused on maintaining and promoting a safe and healthy workplace for all employees. We are certified with the ISO 9001:2015 standards and constantly improve our operational practices.

Safety at work is a basic human right, and working conditions affect our employees directly and their families and the communities in which they live in, indirectly. We care for our people and we aim to meet and exceed compliance requirements in order to provide a safe working environment for all personnel both ashore and onboard our vessels. Our operations promote safety and aim to protect human health, the environment, and property.

To achieve this, we:

- Comply with all applicable laws and regulations, and apply responsible standards of best practice where laws and regulations do not exist.
- Identify and mitigate risks that potentially affect employees, contractors, or the public.
- Share industry insights about health and hygiene risks within our employees.
- Seek medical services for the treatment of employee occupational illnesses or injuries and for the handling of medical emergencies.
- Implement programs, trainings and appropriate protective measures to control risks.
- Support voluntary health and hygiene promotion campaigns aimed at improving employees' well-being and increasing personal safety.

Type	Description	Total	Average per vessel

PSC Deficiencies

# Our response to the COVID-19 pandemic

Health and Safety of our people has been our top concern during the COVID19 outbreak. The rapid spread of Coronavirus has had a major impact in the shipping industry. In order to address this critical threat, we designed effective response strategies and procedures, that helped us continue our worldwide operations uninterrupted, while also ensuring the safety of our employees. As part of our COVID-19 response we:

- Developed and implemented on board all our vessels a Covid-19 management manual and continuously alerted and educated our crew on board on safety and health procedures.
- Provided in a timely manner supplies of safety equipment and disinfectants to all ships and offices.
- Introduced a remote work program for our shore employees and implemented COVID-19 prevention policies within our office as per the guidance of the World Health Organization and National authorities.
- Suspended most business travelling of our employees.
- Crew changes were arranged following the enhanced health and safety procedures and measures
- Supplied our vessels in a timely way with the necessary provisions, stores and spares in order not to disrupt their operations.
- Employed local surveyors to perform external vessel audits and introduced processes and systems to carry out internal audits remotely.
- Promoted remote training to ensure continuous education

# Safety at sea

A safe environment aboard our ships is of paramount importance for us. Our goal is to manage and eliminate safety risks associated with our activities, and protect the safety of our employees and others involved in our operations, by preventing accidents, injuries, and occupational illnesses.

In order to achieve these goals, and increase safety awareness among all our employees and through our operations, we:

- Comply with all applicable laws and regulations, and apply responsible standards where laws and regulations do not exist.
- Encourage ongoing training to employees throughout the organization.
- Evaluate our safety risks and establish appropriate safety measures.
- React promptly, effectively, and with attention to emergencies or accidents resulting from our operations.
- Continuously review and assess our procedures and apply additional measures where deemed necessary.

We invest in our people, policies, and equipment as we try to protect both our people and the environment in an effort to meet our significant goal of **zero** spills and incidents.

Our older vessels are regularly audited by **Rightship** ensuring compliance with latest regulations, evidencing our commitment to safety and to quality services. During the reporting period, we recorded **no fatalities** and **no marine casualties**.

## RIGHTSHIP

**1 minor oil spill** occurred onboard m/v Eirini P. on September 20<sup>th</sup>, 2020 at Singapore of about 200 ltrs which leaked in to the sea during bunkering operations. The leak was contained with oil booms and absorbent materials. A relevant investigation and analysis was carried out along with relevant corrective and preventive actions that were implemented.

We aim to further strengthen our safety policies and increase the safety awareness of our employees through training, seminars, campaigns, and team activities in our purpose to minimize safety risks.

### Cyber security

We are concerned of the latest technological advancements' side effects of greater exposure to cyber attacks. In an effort to protect the Company's information and computer systems from possible threats, the Company has developed a cyber security manual and relevant procedures that include protection measures and users' guidelines.

### General Data Protection Regulation (GDPR)

The EU GDPR came into force in 2018 and provides the required guidelines for the proper collection, storage, use and process of the individual's personal data within the EU, in an effort to protect the individual's rights and personal data. In this respect we have carried out the required gap analysis and managed to implement the necessary procedures to safeguard the personal data as required by the regulation.

3

ENVIRONMENT

# Environmental Management System

We are committed to protecting our environment and this commitment is reflected in our Environmental Protection, Safety and Quality Policy. We seek to minimize the impacts of our operations on both air quality and the marine environment. To support our policy, we have an environmental management system in place, incorporated in our HSEQ manual, to define our objectives, action plans, strategic ambition, and the corresponding deadlines for our work to reduce potential negative impacts.

EuroDry Ltd through Eurobulk Ltd has been an active member of the Hellenic Marine Environmental protection association (HELMEPA) since 2012 and has registered its vessels in order to support the environmental efforts made by the association and be part of a community which provides training and other benefits for our crew members and our shore based employees. Our CEO is a member of the BoD and is currently the association's treasurer.

Our affiliated management Company, Eurobulk Ltd is certified with the ISO 14001:2015 which sets the international environmental standard. This certificate is annually verified by Bureau Veritas.

# Ecological impact and regulations

EuroDry Ltd embraces all efforts to mitigate its footprint on the environmental change and in this regard the following Company's responses have been summarized:

Regulation	Objective	EuroDry response
Ballast Water Management (BWM)	Sets standards for proper management of ballast water and sediments to prevent the spread of harmful marine species. Entry into force Sept 8 <sup>th</sup> ,2017.	We implement the requirements and keep valid BWM plans onboard and update BW record books . 6 of our vessels (86%) have Ballast water treatment plants (BWTP) installed on-board. We expect the installation of the last BWTP by 2022.
IMO DCS (Data Collection System)	Mandates the collection of fuel consumption data for ships of 5000 gt or larger as part of the SEEMP. Entry into force March 1 <sup>st</sup> ,2018 for data collection Jan 1 <sup>st</sup> 2019.	All the vessels have valid SEEMPs onboard and periodically calculates the EEOI. The Company is in compliance with the regulation and monitors the vessels' performance and emissions through the pre-verifier (Helintec) and finally the verifier, RINA
EU MRV (Monitoring, Reporting and Verification)	A regulation requiring the monitoring, reporting and verification of carbon dioxide emissions from ships of more than 5000 GRT operating in EU ports, aiming to minimize it. Entry into force July 1 <sup>st</sup> ,2015.	The Company is in compliance with the regulation and constantly monitors the vessels' performance and emissions through the pre-verifier (Helintec) and finally the verifier, RINA
IMO strategy on reduction of GHG emissions from ships	Targets the reduction in total GHG emissions from international shipping by at least 50% by 2050 compared to 2008 . Entry into force : October 2018	We are committed to meet the IMOs' ambitious 2050 targets by working with industry peers and stakeholders to make decarbonized deep-sea shipping commercially viable.
MARPOL annex VI	A regulation intended to reduce the amount of sulphur oxide emissions from ships-either by adopting alternate fuels or installing EGC systems (scrubbers) or by using fuel oil with a sulphur content of no more than 0.50% m/m . Entry to force Jan 1 <sup>st</sup> ,2020	We have switched to high quality , low-sulphur fuels to meet the sulphur emissions limits.
Inventory of Hazardous Materials (IHM)	A regulation to control hazardous materials onboard ships for the safe and environmentally sound recycling of ships . Any ship which is 500gt or over regardless of Flag will require a valid and certified IHM onboard if calling at an EU port or anchorage. Entry into force December 31 <sup>st</sup> ,2020	All vessels have received the approval letter for the IHM plan. The on scene survey for certification will be concluded onboard all ships within 2021.

# Environmental change

In an effort to accurately monitor the fleets' performance and air emissions, we have introduced performance software modules and a specialized team to report and evaluate the effectiveness of such. In addition, **86 %** of the fleet is equipped with digital mass flow meters and we are planning the gradual installation of telemetric equipment for high frequency data collection aiming to better monitoring the fleets' fuel consumption and to grow our digitalization front.

We aim to work with reliable and well-qualified suppliers. We are in the process of establishing standard procedures to ensure that our suppliers comply with the International Hazardous Material (IHM) resolutions (which include specifications on chemicals, hazardous materials etc.) and that the materials supplied are in compliance with IMO Resolution MEPC.269(68) and are supported by a Material Declaration Form.

Our fleet of ships operates globally, which means that keeping them properly supplied presents challenges of logistic nature. In order to reduce both our costs and our environmental footprint, we focus on combining supply shipments as much as possible. During the reporting period, **95 %** of supply shipments (from a total of **997** were consolidated mostly on a 3-month basis).

## Supporting the UN SDGs targets

The company is involved in new building projects and through Euroseas Ltd, inherited 3 new eco buildings (out of the total 7) vessels with total capacity 227.500 DWT. Subject vessels are fitted with Propeller Boss Cap Fins which aim to recover the lost rotational energy, reduce the cavitation and provide efficiency gains up to 7% (while 3-5% appear to be more common). These 3 vessels are also equipped with Waste heat recovery system which is designed to recover exhaust gases thermal energy from auxiliary engines, thus producing additional steam in port and at sea to meet ship's energy needs and reduce GHG emissions.

The aim is to modernize our fleet with new vessels and newer technologies which will lead to more energy efficient vessels and an environmentally friendlier footprint to the industry.

Our priority is to minimize CO<sub>2</sub> emissions through our fleet and by renewing our fleet we are confident that we will reach our goal and support the SDG 13 of the 2030 UN targets and the IMO's Green House Gas strategy for reduction in carbon intensity of international shipping by reducing CO<sub>2</sub> emissions per transport work, as an average across international shipping, by at least 40% by 2030, pursuing efforts towards 70% by 2050, compared to 2008); and that total annual GHG emissions from international shipping to be reduced by at least 50% by 2050 compared to 2008.

Among others, the Company periodically holds environmental campaigns in order to raise awareness onboard and ashore and thus promoting an environmental culture and an energy-efficiency focus both onshore and at sea.

The Company sets annual targets, which are monitored on a semi annual basis and include the improvement of environmental performance, energy efficiency, minimization of GHG emissions, discharge and waste and embeds best practices for operational management.

4

SOCIAL

# Our Crew onboard

The quality and commitment of our seafarers are fundamental to the success of our business. Consequently, we consider the safety and development of our crew essential to our operations.

Our Company prioritizes the fair treatment of our employees, providing equal opportunities, assuring a safe working environment and practicing non-discrimination. We have policies in place that ensure that we have no tolerance on these sensible subjects while doing our outmost to ensure compliance. These include the Anti-bullying and anti-harassment policy, our occupational health and safety policy as well as the training and development policy.

---

**During 2020, we employed 307 seafarers onboard our ships, drawn from a pool of more than 1,500\* professionals.**

---

We communicate regularly with our seafaring personnel, gathering information regarding any concerns or expectations they might have, and providing training opportunities to enhance their capabilities and provide opportunities for career development. We remunerate our crew fairly, and in accordance with their expertise, experience, and the responsibilities of their respective positions.

In order to increase motivation, social inclusion, and improve crew retention we offer additional recreational and wellness opportunities such as gym, pool, karaoke and team activities. We also plan on increasing the recreational internet access onboard.

The average age of our seafarers is **39 years old**, with the majority being **Filipinos**. Other nationalities employed include Ukrainian, Romanian and Greek.

- Our aim is to ensure attractive working conditions for all our employees. Our crew **retention rate was 86 %**, and our goal is to increase this rate over time. The average service time onboard was **8.7 months**. This was increased due to the COVID19 restrictions.
- Seaman wages are above ILO (International Labour Organization) levels.
- We also try to acknowledge hard work at an individual level, promoting seafarers accordingly. **79 promotions** (average 11.2 per vessel) were carried out within the reported period of all nationalities both officers and ratings.

# Our shore-based staff\*

Our shore-based staff has significant experience and expertise in the shipping industry in general, and in bulk carrier owning in particular. The value and commitment of our personnel is critical to the employment and smooth operation of our fleet. The high employee retention rate is an important indicator of employees' satisfaction which is evident by the employees' **average time in the Company which is 10.6 years.**

We aim to promote a work environment encouraging commitment among our staff – with practices cultivating mutual respect, equal opportunities, diversity, empowerment, career-advancement, and fundamental human rights. For the reported period:

- We employed 71 shore-based staff, 86% of whom under full-time contracts
- 45% of all our employees were women; 1 of which is head of a dept.
- The Executives Officers of EuroDry include 1 woman (25%)
- The total number of new hires was 4 and we offered 3 internships
- 14% of our shore-based staff have seafaring experience
- The retention rate was 91.5% ,with only 6 employees parting.

## Age group of shore based staff

## Gender of shore based staff

We invest in our people, aiming to support the continuous improvement of their skills and promote further education.

**140 hours of training** were provided to our employees in 2020 (average per employee of 2 hrs), with the following goals:

- ✓ To develop the practical and personal skills of our employees,
- ✓ To inform and educate our employees regarding the latest developments in regulations and industry practices and,
- ✓ To raise the environmental awareness of our employees, with a focus on energy efficiency and the growing regulatory environment.

\* Data was collected from our affiliated management Company which also include vessels not owned by EuroDry Ltd.

# Social responsibility

- EuroDry Ltd has made various donations through Eurobulk Ltd to “Synenosis”, “Greenpeace”, “Childfund”, “The smile of the child”, “Panhellenic club of paraplegic (Anaplasi)” “Frontida association” and “ELPIDA association” among others. Also EuroDry Ltd provided Coronavirus financial aid to Italy.
- Our Company participates in various fundraising athletic competitions providing its own teams formed from its employees through Eurobulk Ltd. We have participated in the Andros International sailing race , the race for the cure (a non-profit organization supporting awareness for breast cancer) and to the Rowing race organized by Hill Dickinson for charity every year. These activities, in addition to their social contribution, build stronger bonds among employees which is an important feature of the Company. Unfortunately this year these initiatives were placed on hold due to COVID19 pandemic.
- On May 8<sup>th</sup> ,2020, the USCG granted the AMVER award to 3 Company’s vessels for 2019. Our Company’s m/v “Ekaterini” has received the QUALSHIP21 award for the period 2019–22.
- The Company is committed to keep the employees and the seamen environmentally and socially aware. Our team through Eurobulk Ltd in collaboration with HELMEPA organizes various activities in order to support efforts to keep the local coastlines clean.
- Through our management Company, we have also participated in the “ADOPT A SHIP” program by the NGO “PROJECT CONNECT” initiative allowing young people to connect with seafarers in order to become familiar with the profession and the maritime industry.

<b>General disclosures</b>			
Statement from senior decision maker	Message from our CEO	2	GRI 402-14
Governance structure	Corporate governance	8	GRI 402-18

# Assumptions

- A. **CO<sub>2</sub> emissions:** Calculations are based on IMO emission factors and fuel consumed, for the reporting period. The financial control approach has been applied for Scope 1.
- B. **Energy consumption:** Calculations are based on tonnes of oil equivalents (toe), using DEFRA conversion factors to calculate energy consumed in gigajoules (GJ).
- C. **Energy Efficiency Operational Indicator (EEOI):** The EEOI measures the fuel efficiency of a ship in operation and is estimated based on fuel consumed, cargo carried, and distance travelled (nm).
- D. **Marine protected areas:** Information on duration of our ships in marine protected areas was not available for the reporting period as it requires extensive data mining from records kept on board our vessels.
- E. **Lost time incident rate (LTIR):** The rate is calculated based on (lost time incidents) / (1,000,000 hours worked), and includes incidents resulting in absence from work beyond the date or shift when it occurred.
- F. **Marine casualties:** The definition of a marine casualty is based on the United Nations International Maritime Organization (IMO)'s Code of International Standards and Recommended Practices for a Safety Investigation into a Marine Casualty or Marine Incident Resolution MSC 255(84), paragraph 2.9, chapter 2 of the General provisions.
- G. **Conditions of class:** The data provided represent the number of Conditions of Class or Recommendations EuroDry Ltd has received from a Flag Administration or a Recognized Organization (RO) that has been delegated the authority to issue such findings. The scope of disclosure includes all Conditions of Class regardless of whether they resulted in withdrawal, suspension or invalidation of a vessel's Class certificate.
- H. **Port state control:** Deficiency rate is calculated using the number of deficiencies it received from regional port state control (PSC) divided by total number of port state control inspections.
- I. Reflects the fleet as per 31 December 2020.

*Disclaimer: Information was gathered to the best of our knowledge basis the tools and resources we have in hand. Although we believe that information provided herein is reasonable, no assurance can be given and we expressly disclaim any obligations or undertaking for any discrepancy that may appear.*
